MAVi

In toilets and urinals, because of continuous usage, urea crystals can cause blockage. **MAVi** is an eco friendly clog opener product, contains organic acids, which will replace sink-cleaners, caustic soda or acids.

Due to organic urease enzyme it contains, it dissolves crystals which based on urate and nitrogen.

MAVi contains 98% recyclable organic surfactant which activates the citric acid molecules and opens the clogs fast.

USAGE AREAS

- Urinals
- Drains
- Pipes Blocked Because of Limestones

APPLICATION

Urinal and Drain Application:

100 ml **MAVi** is diluted with 3 litres of water and applied to 3 or 4 urinals or directly applied to the drain.

Toilet and Main Drain Application:

100 ml **MAVi** is directly applied to the toilet and drain.

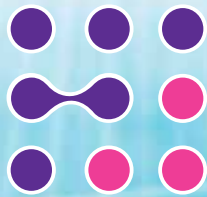

Application in every other day is enough to avoid reoccurrence of cloggings.

When our bacterial products such as **ODORIENT** are applied alternately with **MAVi**, the problems like malodor, deposits, thickening, clogging are solved completely and continuous maintenance is provided.
